Cypress
(*Cupressus Sempervirens*)

Red Thyme
(*Thymus Zygis*)

Rosemary Spanish
(*Rosmarinus Officinalis*)

Marjoram
(*Thymus Mastichina*)

Our Facility

Biomass boiler

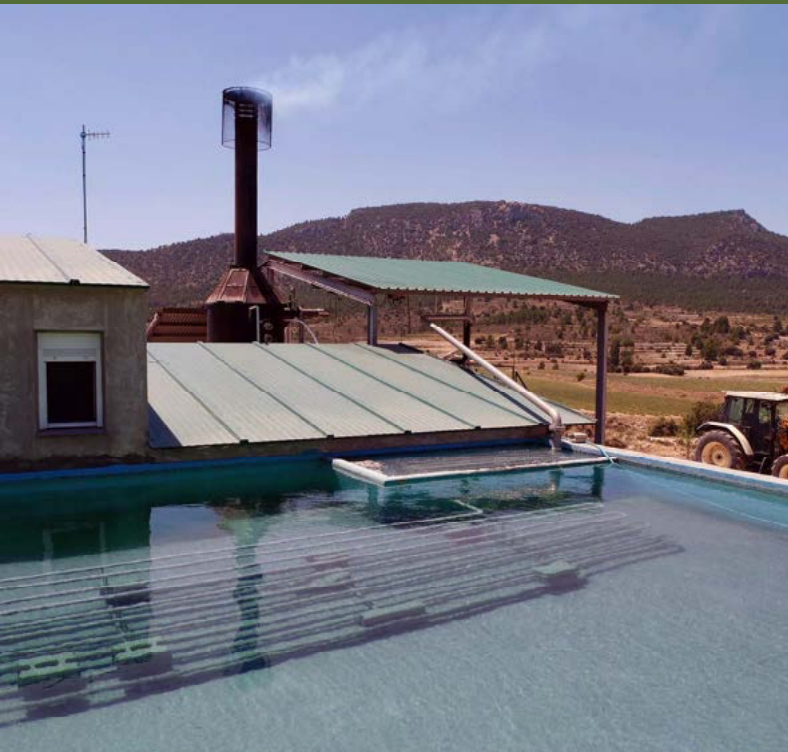

2 Stainless steel distillation towers

Transport and unloading of raw material

Florentine glass (decanter)

Cooling area

Process

In 2016 we built our own facility for steam distillation of essential oils.

Cutting's nursery for next plantations

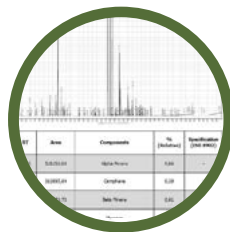

Plantation

Harvesting

Steam distillation of aromatic plants

Analysis & Quality Control

Technical documentation

Storing of the production in stainless steel tanks

Preparation and shipping of orders

Certifications & Sustainability

Organic Farming
Organic Distillation

ES - ECO - 024 - MU
Agricultura UE

Distillation process by
biomass energy

REACH regulates the
production and use of
chemical substances as
well as its potential
impact on the human
health and the
environment.
